Title: PrettyCool Caliper capacitive scale

Size: A3	Date: 2026-11-07	**Rev: A**
KiCad E.D.A. 9.0.9		Id: 1/2

Mounting (plated M2, back-copper ground)

One hole at each end, clear of the 150 mm measuring range. The pads tie the back ground plane to the beam through the screws, so the scale's reference is the beam potential, as the slider's guard ground is.

Fiducials

One per end (front side), for the reflector-pattern inspection and any later assembly

Power flag

GND has no driver on a passive board
